

USE OF SCHOOL FACILITIES

BARABOO SCHOOL BOARD POLICY

830

The Board of Education believes in and encourages the use of buildings by the community when such activities do not interfere with school programs. The Board recognizes the capital investment that the community has in school buildings and facilities and believes such facilities should be used for legitimate community purposes.

The Board does not encourage the use of buildings by nonlocal or private gain organizations. Approval of building use to such organizations may be granted when a local organization agrees to act as sponsoring agent. School facilities shall not be used for any instructional purpose for which a private individual is paid other than those programs approved by the Board or designee.

The Board is responsible for the care and maintenance of school facilities. Because of this responsibility, individuals or groups using school facilities are expected to abide by established rules and facility use regulations. Facility use shall be granted or denied in accordance with District procedures. Facility use fees will be recommended by the Director of Business Services and approved by the Board.
