

**In 2012,** the community and District developed a long-range Facilities Master Plan to guide the updating and revitalization of all seven of our schools. At that time, we realized that given the magnitude of the investment needed, the plan would need to be implemented in phases. We have completed the first two phases on time and within budget.

PHASE	PROJECT	STATUS
Phase I	Address safety, security and maintenance district-wide	Completed 2015
Phase II	Update and revitalize Baraboo High School	Completed 2018
Phase III	Complete remaining Baraboo High School projects and update and revitalize Jack Young Middle School	Next
Phase IV	Update and revitalize the Elementary Schools	To be determined
